RUST-FREE
WARRANTY

tritonbarns.com Order Direct: 800-918-6765

Triton stalls are Hot Dip Galvanized after fabrication and completely zinc-coated inside and out. This creates an extremely durable, non-corrosive surface and protects the stalls from rusting. We galvanize according to ASTM A-123 specifications, which requires a minimum 98% zinc coating.

Our track and trolley sliding door system is maintenance free and comes with a Lifetime Warranty. The track is round and self-cleaning, and the trolleys are made from high strength, silent-rolling “Delrin” material.

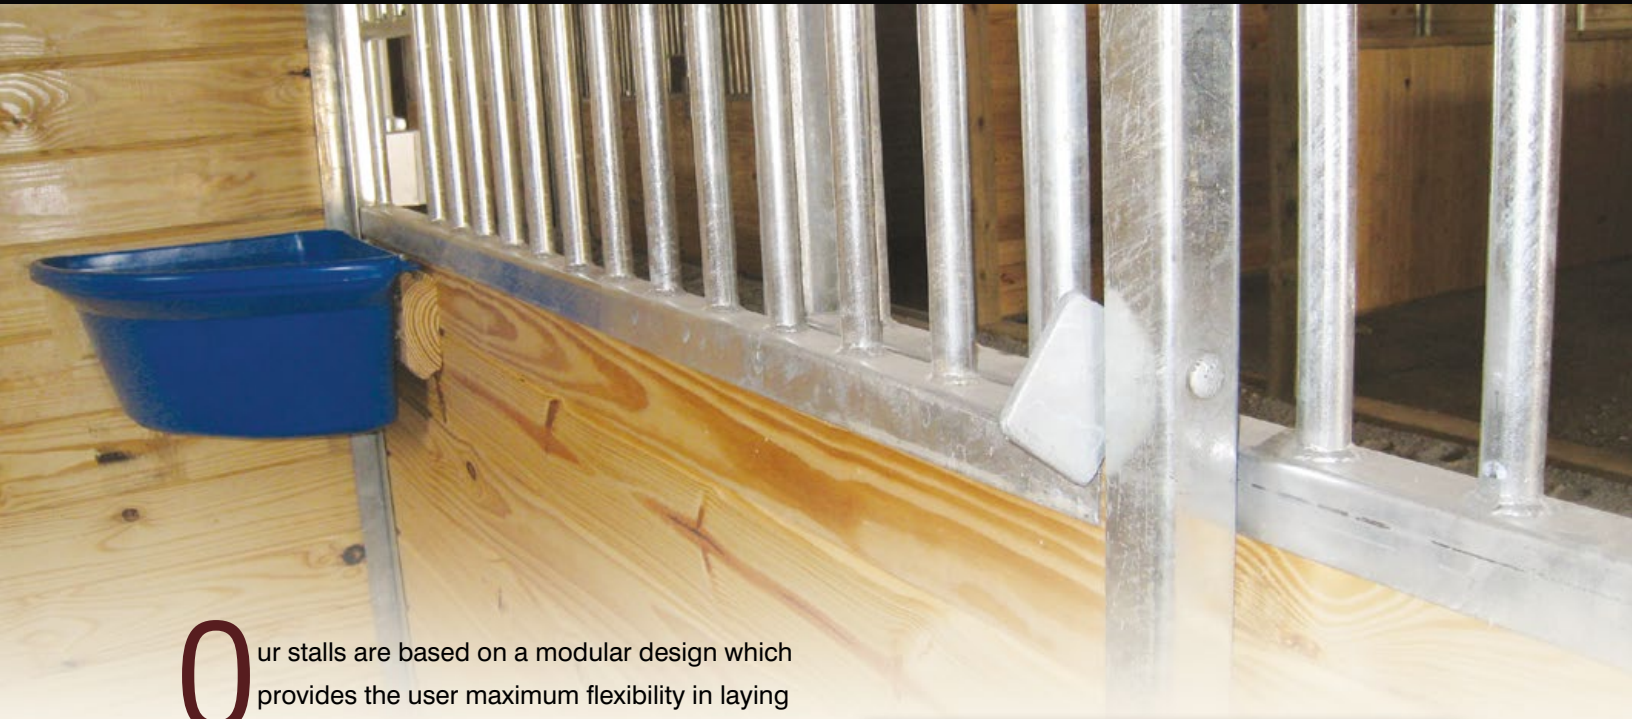

Buy Here, Pay Here.

Call Triton Barns today to learn about in-house financing benefits.

tritonbarns.com Order Direct: 800-918-6765

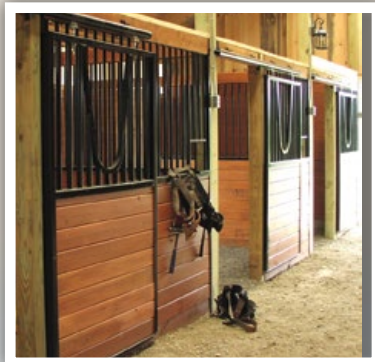

TRITON BARN SYSTEMS

Our stalls are based on a modular design which provides the user maximum flexibility in laying out your barn the way you want it.

The stalls are designed with the safety of both horse and owner. All panels are heavy walled, solid welded one piece frame construction, and all hardware and components are Non-Protruding.

With our custom fabrication shop, if you can dream it, we can build it. Many options and designs are available and your custom ideas are always welcome.

Down the road..

...which would you rather own?

When buying horse stalls the most important factors to consider are – short term costs versus long term costs. Although painted equipment and pregalvanized equipment seems to be an economical choice, upkeep on these products will end up costing you more in the long run. By choosing Triton, you get a higher return on your investment. Hot dip galvanization seals in the strength by bonding metallic zinc to steel for the ultimate protection from corrosion.

FLOORING STALL MATS

25 YEAR
RUST-FREE
WARRANTY

TRITON BARN SYSTEMS

tritonbarns.com Order Direct: 800-918-6765

Triton Barns is proud to offer your choice of several high-quality stall mats the are designed to fit any budget. Mats can range in price from a few hundred dollars to a few thousand, so it's essential to know the A-B-Cs of purchasing mats:

- A – Always get a fully revulcanized mat
(Superior bonding process)
- B – Be sure it has a grooved or footed bottom
- C – Check the warranty

Interlocking mats and Straight-Edge mats

Features of both style include:

- Made of recycled, fully revulcanized rubber
- Full 3/4" thick 4'x6' mats, very heavy-duty
- Each mat weighs around 100lbs.
- 12-year Warranty

Triton also carries MightyLite mats which are the perfect solution for use at horse shows, on trailers, or in grooming stalls. Weighing in at just 12lbs. Each, you can snap a floor together in minutes and storage and transportation are a breeze. They're as tough as they are light - and reversible too."

TRITON BARN SYSTEMS

tritonbarns.com Order Direct: 800-918-6765

Triton Barns is proud to offer high-quality rubber pavers as the ideal flooring solution for your horse barn. They're available in terra cotta, forest green, slate gray, and black. Rubber pavers will make your barn floor safer, more durable, less noisy, and more attractive than basic concrete.

Geo Paver

Our dog bone rubber pavers are a cost-effective choice. They're easy-to-install and can be laid in a matter of hours. The pieces interlock with one another to provide an excellent choice for high-traffic areas like barn aisles and stall floors. Even better, they're safe for the horse and owner with excellent slip resistance and shock absorption. The easy-to-clean material doesn't absorb harmful bacteria, making it a hygienic option for your horse stall.

Our long-lasting, interlocking rubber pavers are extremely durable – they don't crack or chip like other flooring alternatives and will last a lifetime. Best of all, Triton Barn's recycled rubber pavers are created from unused tires and a binding agent like polyurethane, so they're an environmentally friendly choice. Here are a few other reasons to choose rubber pavers for your flooring needs:

Geo Pavers use a European interlocking paving brick design to capture a richness of appearance.

- They stand up against harsh weather conditions like rain, ice, and snow – they also won't freeze in the winter.
- They're virtually indestructible – they won't tear or crack – and are a great choice for long-lasting barn flooring.
- Their flexible, soft surface makes them ideal for your stall's floor and aisle way, as they're virtually noiseless and offer a low impact on leg joints.

GEOPAVER HI PROFILE
